# **Global Fitness For Use**

A Practical Guide for Meeting Critical Customer "Use" Criteria

### **Fitness For Use**

•A simple, but comprehensive system used to establish customer needs, define product/process/machines and assure products and processes are in-control and capable.

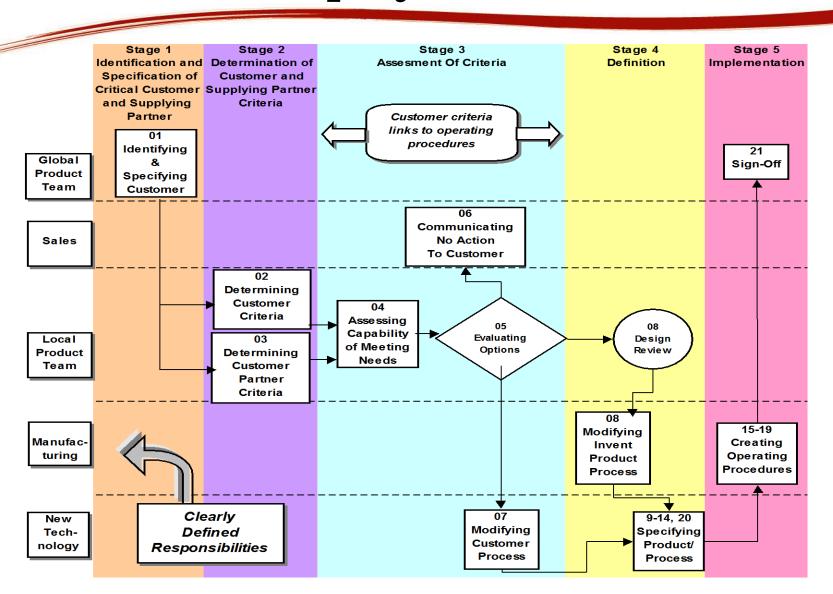

#### •Benefits:

- •Provides guiding principles to determine customer use criteria
- •Creates customer-driven environment
- •Provides a documented understanding of a product/service so that it may be modified in a controlled manner if required
- •Prevents duplication of efforts by clarifying roles
- •Establishes a common product and process language
- •Clarifies relationships between Customer Needs, Product Characteristics, Process Variables and Machine Specs

## 5 Stages of Fitness For Use

- 1. Identify Critical Customer and Supplying Partner Base (MFG Site)
- 2. Determine Customer and Supplying Partner Criteria Determine Use Criteria in the format of Need, Measurement System and Goal
- 3. Assess Criteria
  Compare the customer use criteria to our capability to
  meet the needs. Gaps are identified with an action plan.
- 4. Definition
  Processes and procedures are modified or invented
  Emphasis on linking machine, process and product.
- 5. Implementation Write work instructions and operator control plans

## FFU Deployment Chart

## FFU Customer Criteria Sheet

#### Product Fitness-For-Use Criteria

Customer:	Product FFU Criteria			Product:		TBD - Product to be developed	
Customer Process:	Wet Formed Mat Process		ess	Preparation Date:		4/18/95	
Customer Product: Shingle/Roofing Mat			Validation Date		ite:	4/26/95	
End Use:	Roofing Shingles and		Roll Roofing Prepared By:		:	Stephen Beli	
customer's language and	FFU Criteria are given a elative importance based the		the methods that a Customer		M ust be achieved against the measurement system that represents satisfactory performance.	This column is updated when an assessment of how Owens-Corning is doing versus the criteria is made.	This column is used to communicate Owens- Corning's action to fill a "gap" between desired and actual performance.
USE CRITERIA		RANK	MEASUREMEN	T SYSTEM	GOAL	ASSESSMENT	PROGRAM
A. PRODUCT							
					1	1	
·		1	UL 5 Rating		100% Pass		
regulatory standards.			ISO 828		475 11 15 1
